

THIRD ORDER EFFECTS
SECURE | STABILIZE | UNITE

CAPABILITY STATEMENT

Third Order Effects, LLC (3OE) is the premier choice for filling Governance and Cultural Advising roles and is uniquely qualified to provide strategic advising and consulting in areas of unrest. 3OE's foundation is to provide expertise in securing sound governance and stabilizing areas of unrest to provide a safe and secure environment; by uniting the people and communities and the infrastructure developed to support them.

GOVERNANCE ADVISING

Applying the prescribed capabilities for expert ministerial advising

BUILDING PARTNER CAPACITY

Experts for Humanitarian Assistance, Security Cooperation, and Security Assistance

TRAINING

Role-players and SME's for modeling and simulations; POI development; Scenario Development: and Instructors.

The 3OE Difference

Third Order Effects

It's more than a name. Our mission is to provide experts today that will not cause adverse second and third order effects in twelve months or twelve years.

Bringing the Right Expert by Building a Community

Our people come from both sides of the civ-mil spectrum and have served as both leaders and practitioners. We seek experts from within the U. S. Armed Forces, Governmental Agencies, Academia, and Industry. We embrace the varying areas of expertise and believe it provides our customers with the greatest chances of success. Our approach brings a deeper bench whether seeking experts in building partner capacity or providing Subject Matter Experts for training exercises for both civilian and military clients.

Governance Advisement for U.S. Interests

3OE is interested in closing the gaps. Our experts advise U.S. and allied nations to secure, stabilize, and unite their people. Our north star remains whatever is in U.S. national interests.

3OE Technology

3OE continues to develop proprietary mobile applications to enable our clients to reach the right expert at the right time for long- and short-term contracts as well as reach-back capabilities. We also partner with Computational Security Services to provide clients with a range of solutions to identify audiences, strengthen brand-safe audience relationships, craft narratives, and measure the effectiveness of advertising, information, and influence campaigns.
